Four holds on one of the rock climbing walls are labeled on the diagram below. Matthew first climbs vertically 10 feet from Hold A to Hold B, horizontally 25 feet from Hold B to Hold C, and then vertically 15 feet from Hold C to Hold D.

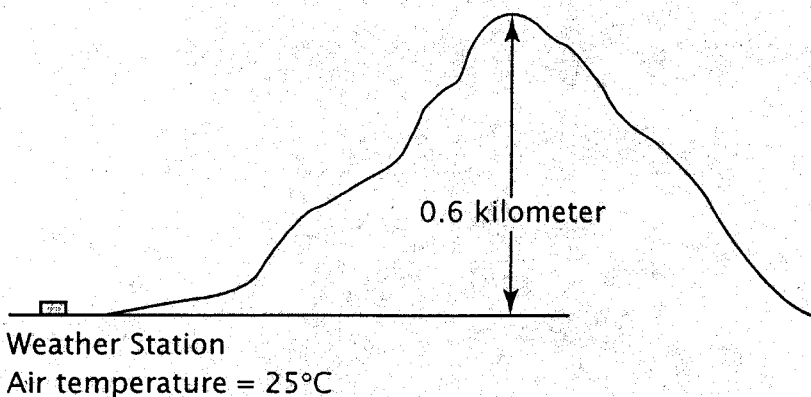

How many ***fewer*** feet would Matthew have climbed if he had climbed directly from Hold A to Hold D? Provide the work that shows how you arrived at your answer.

At a weather station at the base of Taum Sauk Mountain, you measure an air temperature of 25°C . Air temperature decreases about 6.5°C for every one-kilometer increase in altitude. Write an equation that represents the temperature (T) in degrees at an altitude of (y) kilometers.

The approximate height of Taum Sauk Mountain is shown below. Find the temperature at the peak. Provide the work that shows how you arrived at your answer.

Gail must take one photograph of each of 90 rings for a jewelry store. Color print film is sold in two different-sized rolls at the prices shown in the table.

COLOR PRINT FILM PRICES

Number of Exposures	Price per Roll
24	\$2.88
36	\$3.24

How many of each size roll of film should Gail purchase in order to have enough film at the lowest total cost? Provide the work that shows how you arrived at your answer.

Session:	1
Item No.:	6
Page No.:	7
Content Standard(s):	2 Geometric/Spatial Sense and Measurement
Process Standard(s):	1.4

Exemplary Response:

- 15 (feet) or 14.6 (feet) or 14.64 (feet)

OR

Answer appropriately rounded

AND

- $(AD)^2 = (10 + 15)^2 + 25^2 = 625 + 625 = 1250$
 $AD = \sqrt{1250} \approx 35$
 $10 + 25 + 15 = 50$
 $50 - 35 = 15$

OR

- $15^2 + 15^2 = c^2$
 $450 = c^2$
 $15\sqrt{2} = c$

$$10^2 + 10^2 = c^2$$
$$200 = c^2$$
$$10\sqrt{2} = c$$

$$15\sqrt{2} + 10\sqrt{2} = 25\sqrt{2} \approx 35.3553$$
$$50 - 35.3553 = 14.6447 \approx 14.64$$

OR

Other valid process
